

MHS students give back to the Marshfield community

The Personalized Pathways students pack weekly Nutrition on Weekend (NOW) meals. They are responsible for preparing the sack lunches for the students at Madison Elementary and the high school who are enrolled in the program through the United Way. Ms. Wolff's Tiger Time students often help assist with this as well.

Mr. Scheuer's Construction Capstone class partnered with the Wildwood Zoo to re-side the food storage building for the Elk, providing a much-needed update.

MHS FCCLA members spent a morning in the Foods Lab preparing the dressing that they donated to Marshfield's Community Thanksgiving Dinner.

FINANCE AND INVESTMENT CHALLENGE BOWL

END OF ROUND 3

MHS students impress at Finance Bowl

24 students, split into 6 teams recently competed in the Finance Bowl at NTC in Wausau. Out of 36 total teams, Marshfield finished 2nd, 3rd, 4th, and 5th place.

Henry J. was named to the All-Tournament team and the group as a whole left many people impressed with not only their knowledge, but their behavior as well.

Hands-on career experience

Latrell is a student in the Future Teacher Internship course at Marshfield High School. In this course, he volunteers with a mentor teacher in the School District of Marshfield to learn about his career goal of becoming a science or math teacher. In this photo, middle school students were working on the distributive property. When a student asked Latrell a question, he used skills he learned in the course to help the student.

Creativity shines thru student writing

The levels of originality and depth of writing this year during the annual Spooky Short Story or Poem Contest blew Mrs. Nagel away in both of her sections of Creative Writing. Even though it wasn't a graded assignment, many students put their all into it to frighten their classmates on the scariest of days: Halloween!

Flying into the future

MHS students Trevor M. and Owen S. created a custom-modified competition drone for the Skills USA Commercial sUAS Drone competition.

Using the engineering skills that they have received at Marshfield High School and under the direction of MHS teacher Caleb Henderson, the team learned valuable lessons that have made an impact on their future.

Click [here](#) to learn more about their journey.

Shout out to...

Mr. Lang's AP Calculus BC class as they just finished their unit 4 exam on derivative applications with a class average of a 96%! An incredible accomplishment indeed with all of the writing required.

Career exploration

All 6th grade students in the School District of Marshfield visited Marshfield High School in mid-November to learn about courses and careers related to Agriculture, Business & Information Technology, Family & Consumer Science, and Technology Education.

Marshfield High School students enrolled in these classes and their teachers facilitated educational, fun, and hands-on activities for the students related to soil layers and conservation, finance, computer programming, nutrition, kitchen measurement and culinary techniques, woodworking, electricity, graphics, engineering, welding, and more!

Pathway Partners connects students to career opportunities

Through Pathway Partners, MHS students learn about careers by interacting with guest speakers across all 16 career clusters, during their 30-minute flex periods.

Nick Anderson (pictured above) from Boson Company was here on Thursday, November 9 and shared with students in the Architecture & Construction Career Cluster.

MHS alumni shares academic success

MHS Alumni Suhaas Bhat recently won the Rhodes Scholarship as a senior at Harvard University. He credits his academic success in college and his ability to win this prestigious scholarship to his rigorous academic courseload at Marshfield High School and all the teachers who pushed him in a variety of subjects.

He said, without a doubt, that Marshfield High School is on par with or better than some of the most expensive prep schools in the country. He wanted all staff at our school to know how grateful he is that he was able to be a student at Marshfield High School.

A taste of the nations

English Language learners brought in food for a Multicultural Food Around the World day. Students could bring any food from any culture. During Communication Skills, the students then presented on their foods and what culture it was representing.

Community members visit MHS

Leadership Marshfield participants visited Marshfield High School on Thursday, November 16. While at MHS, they enjoyed lunch prepared by students in the Food & Hospitality course and served by FCCLA members, toured the high school, and heard from current MHS students about their comprehensive high school experience.
