

School District of Marshfield Course Syllabus

Course Name: Electricity/Electronics Length of Course: 1 Semester Credit: .5

Program Goal(s):

Empower learners to be college and career ready through standards-based experiences in the classroom and career-based learning experiences with business and industry partners. Learners will engage through technology in design, building, problem-solving, repair or service, in a collaborative environment through theory and hands-on experiences.

Course Description:

Learn the fundamentals of electrical and electronic systems and components in order to build and troubleshoot working circuits and devices. Examples of activities may include building electromagnets, household wiring, electric motors, circuit boards, robots, two-way radios, soldering joints, and basic computer hardware.

Standards:			
Wisconsin Technology & Engineering – Broad Based (BB)			
Standard	Learning Priority	Performance Indicators	
BB1: Students will analyze the core	BB1.a Analyze and use	BB1.a.5.h Describe how systems	
concepts of technology	technological systems	can fail because of design flaws,	
		defect parts, poorly matched parts	
		or they were used beyond their	
		design capabilities	

		BB1.a.6.h Describe how the outputs
		of one subsystem given a prominent
		energy, power and transportation
		system
	BB1.c Analyze and use	BB1.c.5.h Given a linear, rotary
	mechanisms.	and/or compound motion
		mechanism, students will measure
		and calculate units such as work.
		power, torque, gear ratios, and
		mechanical advantage.
	BB1 d Analyze and use electricity	BB1 d 6 h Perform a voltage drop
	and electronic systems	test and describe the relationship
		between voltage current and
		resistance with a multimeter
		BB1 d 7 h Inspect and test
		components such as switches.
		connectors, relays, and solid state
		devices and conductors and take
		appropriate action
	BB1 e Analyze explain and use	BB1 e 6 h Select and perform
	control systems	appropriate maintenance is the
	control systems.	process in order for the product or
		system to continue functioning
		properly to extend its life or to
		upgrade its canability given a
		flawed product or system

and materials in electronics	applied to circuits.	procedures, and operation of
technology.		equipment.
		EL/.a./.n Describe personal safety
		precautions for working with
		electric and electronic devices
		electrical shock.
		EL/.a.8.h List various degrees of
		current the body can tolerate.

Wisconsin Common Career Technical Standards (WCCTS) -Creativity, Critical Thinking,			
Standard	Learning Priority	Performance Indicators	
Standard: 4C1: Students will think and work creatively to develop innovative solutions to problems and opportunities.	4C1.a: Develop original solutions, products and services to meet a given need.	 4C1.a.4.m: Analyze elements of a problem to develop creative solutions. 4C1.a.6.m: Describe how past experiences can inform current problem solving. 4C1.a.7.h: Develop original ways to solve a given problem. 4C1.a.8.h: Design a product or service that could fulfill a human need or desire. 4C1.a.9.h: Apply past experiences to current problems in developing innovative solutions. 	
	4C1.b: Work creatively with others to develop solutions, products and services.	 4C1.b.4.m: Explain how multiple people can develop better solutions than an individual. 4C1.b.5.m: Explain how multiple people and perspectives can develop better ideas than an individual. 4C1.b.6.m: Explain how multiple people and perspectives can improve an existing product or process better than an individual. 4C1.b.7.h: Incorporate the skills and experiences of others to develop a new solution to a problem. 4C1.b.8.h: Work as part of a team to design a product or service that could fulfill a human need or desire. 4C1.b.9.h: Work as part of a team to improve an existing product or process. 	
Standard: 4C2: Students will formulate and defend judgments and decisions by employing critical thinking skills.	4C2.a: Develop effective resolutions for a given problem, decision or opportunity using available information.	 4C2.a.5.m: Analyze symptoms to identify the root cause of a problem. 4C2.a.6.m: Develop multiple resolutions for a given problem, decision or opportunity. 4C2.a.7.m: Identify problems that became worse due to poorly thought out or poorly informed solutions. 4C2.a.8.m: Explain how implementation of a solution or action may affect one or more corresponding systems. 4C2.a.9.m: Explain how different resolutions may be appropriate under different circumstances. 4C2.a.10.m: Explain the process for choosing an action or making a decision. 	

		4C2.a.11.h: Determine the
		information needed to address an
		identified problem.
		4C2.a.12.h: Contrast the benefits and
		drawbacks of various proposed
		resolutions to a given situation.
		4C2.a.13.h: Predict how an action
		could result in unintended
		consequences both positive and
		pogativo
		4C2 = 14 h. Analyze the impost of a
		4C2.a. 14.11. Analyze the impact of a
		model.
		4C2.a.15.h: Determine the best
		resolution for a problem, decision or
		opportunity based on given criteria.
		4C2.a.16.h: Defend an action taken
		or a decision implemented.
	4C2.b: Develop and implement a	4C2, b, 3, m: Analyze problems to
	resolution for a new situation	determine what past experiences
	using personal knowledge and	might be related and relevant
	experience	4C2 h A m: Analyze a problem to
	experience.	determine how it relates to existing
		knowledge
		AC2 h 5 h. A mala next annexisment to
		4C2.b.5.n: Apply past experience to
		develop a course of action for a new
		situation.
		4C2.b.6.h: Use existing knowledge to
		develop a resolution for a new
		situation, problem or opportunity.
Standard: 4C3: Students will	4C3.a: Communicate thoughts	4C3.a.8.m: Implement effective
communicate and collaborate with	and feelings with others using	listening skills in resolving a
others to accomplish tasks and	verbal and non-verbal language.	situation.

AC Current	DC Current	Movement	Series Circuit
Ammeter	Diode	Ohmmeter	Transistor
Capacitor	Electromagnet	Parallel Circuit	Voltage
Conductor	Generator	Power	Voltmeter
Combination Circuit	Insulator	Resistance	
Current	Magnetism	Resistor	

Topics/Content Outline- Units and Themes:

Quarter 1:

- Electricity
 - Generating Electricity
 - o Parts of Circuits
 - o Types of Circuits
 - Measureable Electrical Terms (Ohm's Law)
 - o Digital Multimeter Usage
 - Wiring Diagrams

Quarter 2:

- Electronics and Soldering
 - o EKI Software Electrical Components
 - o Ohm's Law
 - o Snap-Circuits
 - Soldering
 - o Understanding Relays
